Dear Andy:

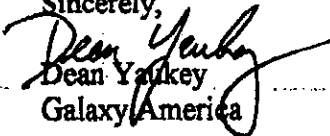

I am writing to you on behalf of Type Certification TC-00244-00 Galaxy Rodeo Bull Ride.

We have established further review of our NDT statement with the professional assistance of Cheryl Garrett from PLT Testing. Cheryl is an MT Level 3 ASMT #92172 tester. We have determined that RT (xray) and UT (ultrasound) testing is not appropriate for this unit. The welds are inaccessible and the unit is not constructed for these types of testing.

Therefore, we recommend the correct type of testing to be Magnetic Particle Testing.

Also, based on the service record of our product, we have determined that NDT is not required every year, but instead should be documented and performed every 5 years of active service. We currently have over 200 units in the United States and over 500 worldwide. There has not been one case of cracked or broken welds.

Sincerely,

Dean Yaukey
Galaxy America
