To: All Amusement Ride Inspectors/Safety Officials
Subject: High-Lite Rides 10 year overhaul

It has been brought to our attention that some of the rides we have manufactured have not been maintained by the recommendations listed in our manuals. High-Lite Rides recommends that all of the mechanical amusement rides manufactured by our company are to have an inspection/overhaul every (10) ten years by High-Lite Rides or a company approved by High-Lite Rides. It is important that the ride be completely gone through and inspected and any parts that are not up to standards replaced every ten years. This recommendation is for the safety of the operator of the ride and the public. All rides manufactured by High-Lite Rides are on notice that if the ten year inspection/overhaul is not preformed in its due time our company will issue a shut down of that particular ride. Thank you for your cooperation on this matter.

High-Lite Rides Owner
