

RESISTOR ILLUSTRATION

ATTENTION TURN-TIKE OWNERS

TO GET BETTER CONTROL OVER THE TURN-TIKE CARS GOING DOWN THE RAMP, WE RECOMMEND.

- 1) INCREASING THE LENGTH OF THE "DEAD" SECTION OF TRACK TO 15 FT.
- 2) CONNECTING THE "DEAD" SECTION OF TRACK TO THE TRAILER FRAME OR TRACK SUPPORT POST THRU A VARIABLE RESISTOR.

Dear Customer:

We have just developed a urethane steering wheel for our TurnTike cars. These wheels are offered as a replacement for existing steering wheels for added safety as they are flexible and soft.

These are the same size and bolt on the same as existing equipment. Cost per wheel is \$11.66.

We recommend these steering wheels as an added safety measure for these cars.
